

First Agent Flow — Request Triage

Input

```
{
  "request_id": "",
  "text": "",
  "source": "training"
}
```

Flow

1. Validate required fields.
2. Classify request.
3. Decide whether knowledge lookup is needed.
4. Call approved read tool.
5. Prepare draft.
6. Run risk/boundary check.
7. If any external action would be required → human approval.
8. Finish and log.

Output

```
{
  "category": "unknown",
  "facts_used": [],
  "draft": "",
  "risks": [],
  "requires_human": true,
  "next_action": "review"
}
```
